Beyer Roofing Corporate Profile

History

Beyer Roofing Company, a privately-held, family-owned and operated corporation, was established in 1954 and incorporated in 1979. Currently in our 50th year of installing thousands of quality roofs, we owe our success and growth to quality products and service. With over 180 years of combined roofing experience and over 10,000 successfully completed roofing projects, you can count on Beyer Roofing to stand by its work.

Facilities

Beyer Roofing built its new state-of-the-art corporate office and warehouse in Saginaw just off I-75 in 1996. With over 26,500 total square feet, these facilities improved how we will handle the future growth of our business and how we service our customers.

We have over 19,000 square feet of warehouse space in which we store a current inventory of over \$150,000 to insure all materials are kept dry until they are installed, assuring the highest quality product for our customers.

Our truck storage bay is over 7,000 square feet, keeping our trucks and other installation equipment out of the weather and ready for use. Less exposure to the elements also means safer, more reliable and better performance.

Financial Status

Beyer Roofing Company is a solid business with one million dollar bonding and a half-million dollar credit line. With a sound financial base, we are capable of handling several large or long-term projects at any given time.

Man Power

Beyer Roofing is a non-union roofing company that, as an equal-opportunity employer, employs up to 30 men and women. Our employees have over 180 years of combined roofing experience. We have the man-power and equipment to get the job completed on time every time. Our response time to start and complete projects is continually improving.

A Goal of Quality . . .

Beyer Roofing Company's goal is to give you a roof system that will exceed your expectations. Our service to you will be above the industry standards to reinforce your decision to select Beyer as your roofing contractor.

Beyer Roofing has established a reputation to take care of **any** problem, whether we are at fault or not. We invest considerable time and assets each year to satisfy customers and provide solutions to problems other companies would try to avoid.

Commercial Roofing

Beyer Roofing Company is known state-wide for its quality work on commercial roofing projects.

No job is too big to handle! We can do shingled commercial installations as well as flat surface roofing systems.

Recent Projects:

Sears

Sears, Roebuck and Co. has hired Beyer Roofing to repair and reroof several of its retail outlets. These large- scale commercial projects are perfect for Beyer Roofing we have the right kind of expertise, equipment and materials.

● Apple Mountain Development

At the Apple Mountain Development in Saginaw, Beyer Roofing Company was the roofing contractor for the newly-constructed and remodeled ski lodge and accessory buildings. The shingled roof's detail included tower roofing, dormer roofing and an octagonal-shaped part of the building that overlooks the Apple Mountain's ski hill.

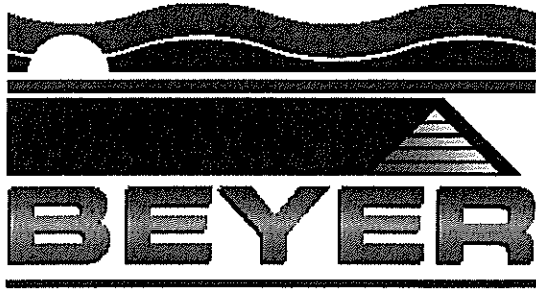

● Cornerstone Mall

Beyer Roofing Company was the roofing contractor for this newly constructed mini-mall in nearby Shields. The shingled-roof detail once again included smaller accent features as well as dormer roofing.

Special Use and Residential Roofing

Beyer Roofing Company can handle the special and the unique. Some special use buildings such as churches and many older residences have very complex roof systems. They will often have very steep pitch, numerous peaks and valleys, and will have details that fit the time era in which they were constructed. Beyer prides itself on being able to help these buildings retain their original look and feel while providing a better roof system that will help them remain in use for another generation!

● Special Use

● St. Stanislaus Catholic Church

Steep-pitched spires and main roof were the one of the special problems when dealing with this roofing contract. Beyer Roofing also had to match current shingle materials with the look and feel of the architecture of of this early 20th century church located in Bay City, Michigan.

Proven Quality Systems

Beyer Roofing Company is continually researching and tracking new products and roofing systems before we risk our reputation on them. We avoid the pitfalls of untested products that could be below the Beyer Roofing standard. A good track record must be established by the product and the manufacturer before it is used by Beyer Roofing. We are also continuously updating our application specifications.

Our testing and research accounts for our excellent quality track record. We have never used or installed a system that has failed to measure up to our high standards of reliability, durability and workmanship. Thus, Beyer Roofing Company can complete your job on time *every time*.

Duro-Last®

Beyer Roofing is proud to be an authorized installation and repair contractor, for Duro-Last® roofing systems, "The World's Best Roof." The Duro-Last® system is one of the best roofing systems available for quality, comparable ease of installation, and

warranties. We have been using the Duro-Last® roofing system successfully for over 15 years with no failures.

● Warranties

Beyer Roofing Company honors all manufacturers' warranties, not only for roofs that we installed, but for roofs installed by our competitors. The best of roofing systems can only perform to the standards of installation workmanship. The Beyer name is synonymous with high standards. We stand behind our work.

Safety

● Insurance

The Beyer Roofing Company has one of the best safety records in the roofing business. Our current Worker's Compensation Experience Modification of .072 is a result of our emphasis on safety. The link between safety and quality is one we stress to all our employees.

Beyer Roofing Company carries more than the maximum amount of insurance to protect our employees and our company from liability claims that could occur during any job. The cost of this extra insurance is well worth the price should it ever be needed.

● Safe People, Safe Equipment

Our safety procedures and programs are above the industry standards and we review these programs on a regular basis, updating whenever necessary.

Our well-maintained fleet of trucks and installation equipment must also meet rigorous standards. Beyer Roofing follows regular maintenance schedules and keeps its equipment in its state-of-the-art storage buildings and out of the weather until it is needed so that it can perform safer and more reliably.
